## Introduction

This document describes the changes made to release 4.5.11 of Sumac to create release 4.5.12.

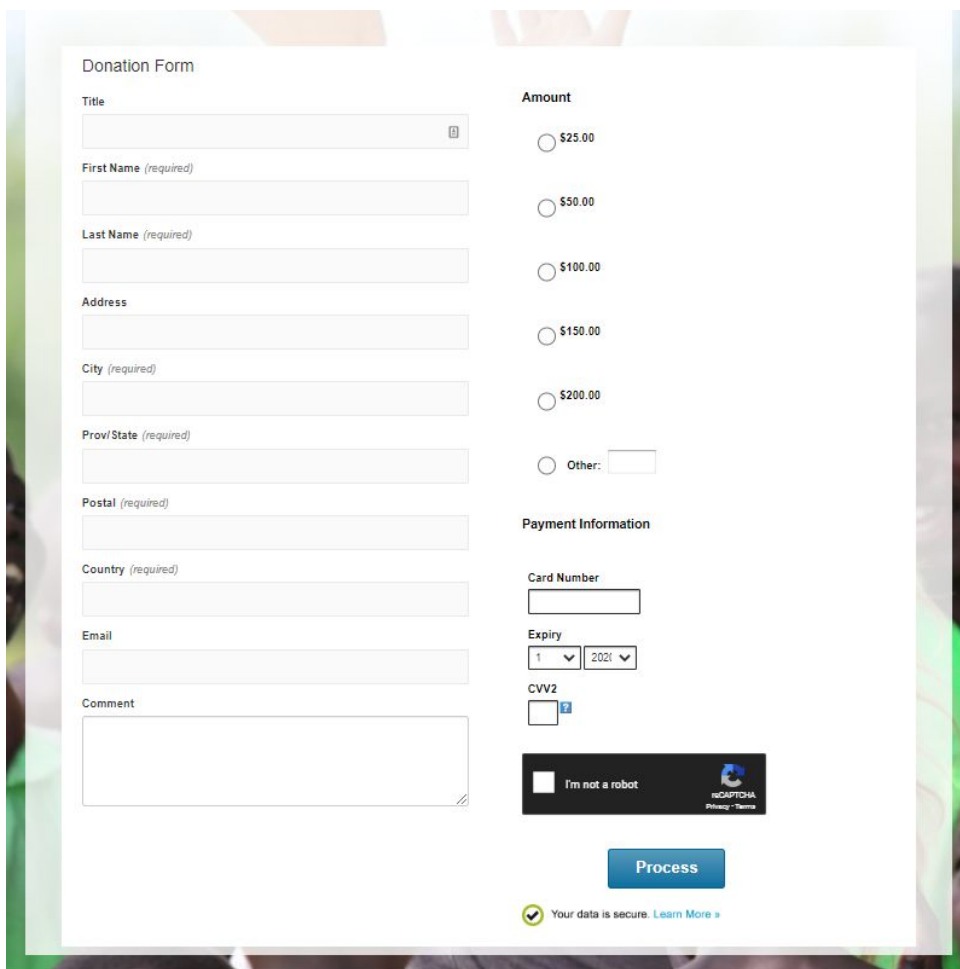

## New Era of Sumac Web Forms

### New Feature!

This release of Sumac introduces the foundation for a new era of Sumac Web Forms, starting with a new Online Donation Form integrated with iATS payment processing.

Our new forms provide a simple page for collecting online donations. The pages allow for quicker onboarding and set up of new pages, and integrate with your Sumac CRM through an API with iATS.

When importing online donations into your database through the iATS API, Sumac creates new donors and saves their donations to the database, and ensures duplicate contacts are not created for returning donors. After the donations are successfully imported into the database, Sumac sends a confirmation email to donors automatically.

The image shows a screenshot of the Sumac Online Donation Form. The form is titled "Donation Form" and is divided into two main sections: "Donor Information" and "Payment Information".

**Donor Information:**

- Title:
- First Name (required):
- Last Name (required):
- Address:
- City (required):
- Prov/State (required):
