

Version 4.5.2 Database Release

2018-03-06

Notice To Clients

In this release, we update Sumac version 4.5.1 to 4.5.2. This release focuses on structural database enhancements and improvements to the release update process. These changes do not noticeably change any portion of the user interface as all the changes were “under the hood” of Sumac.

If you have any questions about changes in this release, please reach out to us at: info@sumac.com
