## **Introduction**

This document describes the changes made to release 4.5.14 of Sumac to create release 4.5.15.

### **New Fields Available to Show in Online Course Registrations Catalog**

In previous versions of Sumac, users were limited in the fields available to show their registrants in an online catalog of courses available for registration. Only the Course Name, Session Start Date, Session Duration and Instructor Name were available.

In today's release, in addition to the original fields available to show, Sumac's online course catalog now shows the Session Code, Session Start Time and End Time, Session End Date and Location. These new options improve the appearance of Sumac's online course catalogues, and also make it easier for registrants to select the course they want to register for.

### **New Font in Built-In Reports**

As part of the continuing effort to improve Sumac's user-interface, we have modernized the font style used in all of Sumac's built-in reports. Reports now use Arial font, as well as an improved font size to make Sumac's built-in reports cleaner and easier to read.

This new font is the first in a series of improvements to the appearance of Sumac's built-in reports. Future releases will introduce the ability for users to upload their logo and colours, so clients can easily produce clean and professional-looking reports for printing, emailing, or including in presentations.
